

ISMAIL ELYAN

AI Engineer | Generative AI & Agentic Systems Specialist

Cairo, Egypt | +20 106 925 3293 | ismailalyan1234@gmail.com | linkedin.com/in/ismail-elyan-703227275

IMMEDIATELY AVAILABLE • OPEN TO REMOTE / ON-SITE / HYBRID • FLEXIBLE ON LOCATION

PROFESSIONAL SUMMARY

Results-driven AI Engineer with 2+ years of experience designing, building, and deploying production-grade AI systems spanning Generative AI, Agentic AI, RAG pipelines, and workflow automation (n8n). AWS 4x Certified professional with deep expertise in secure, scalable AI deployments using Docker, Kubernetes, and modern MLOps practices. Proven track record delivering end-to-end solutions for enterprise clients, backed by a strong foundation in cybersecurity, AI/ML security, adversarial defense, and responsible AI governance.

SKILLS

Languages: Python, SQL, C++

AI / LLM Frameworks: LangChain, LangGraph, LlamaIndex, CrewAI, Hugging Face Transformers, MCP

AI/LLM Techniques: Fine-Tuning (LoRA), Multi-Agent Orchestration, ReAct Agents

AI Security: Prompt Injection Mitigation, LLM Red-Teaming

MLOps & Responsible AI: CI/CD for ML, Model Monitoring, Responsible AI Governance

Dev Tools & Automation: Claude Code, Cursor, OpenCode, n8n, FastAPI, Streamlit

Databases & Vector Stores: PostgreSQL, Supabase, Neo4j, Pinecone, FAISS, ChromaDB, Elasticsearch

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD

Data & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, PyTorch, TensorFlow, OpenCV, ONNX

Soft Skills: Communication, Problem Solving, Time Management, Collaboration, Adaptability

PROFESSIONAL EXPERIENCE

AI Engineer & Solutions Architect (Freelance)

Jan 2025 – Present

Self-Employed – Client Engagements

- Architected Nestora, an AI floor-plan furnishing platform (Flutter + FastAPI) using Groq vision/LLM and OpenCV to convert photos into CAD-style layouts.
- Deployed a bilingual RAG admission chatbot (Pinecone + BM25 hybrid retrieval) with automated Google Drive ingestion for 200+ policy documents.
- Built n8n automation workflows for document ingestion, notifications, and API orchestration, cutting manual ops effort.
- Implemented security hardening (prompt-injection guardrails, rate limiting, encrypted storage), reducing delivery cycles by 40%.

NLP & RAG Engineering Trainee

Aug 2025

National Telecommunication Institute (NTI)

- Ranked #1 in cohort (98% score); engineered 5+ production-grade RAG applications using vector databases and LLM orchestration.
- Optimized chunking/preprocessing pipelines, improving response relevance by 35%; implemented RAGAS evaluation for benchmarking.

Cloud Architecture & Security Trainee

Oct 2025 – Dec 2025

National Telecommunication Institute (NTI)

- Designed secure, multi-tier AWS architectures aligned with the Well-Architected Framework across 8 core services.
- Developed cost-optimized IAM policies and VPC segmentation, cutting projected cloud costs by 20% while strengthening security.

Machine Learning Engineering Trainee

Oct 2024 – Jun 2025

Digital Egypt Pioneers Initiative (DEPI)

- Built and evaluated 10+ NLP/CV models (PyTorch, TensorFlow), achieving up to 91% accuracy on benchmark datasets.
- Deployed optimized models on Azure and Hugging Face Spaces, cutting inference latency by 25% via quantization and ONNX.

KEY PROJECTS

AI-Powered Academic Advisor Chatbot — Benha National University

LangGraph, FastAPI, Groq, Neo4j, Supabase, Pinecone, Docker, Python

- Engineered a stateful LangGraph ReAct agent orchestrating 12 tools for real-time bylaw Q&A serving 5,000+ students.
- Designed a 5-step NLP pipeline eliminating 60% of redundant tool calls, with input sanitization and audit logging.

Nestora — AI Floor Plan Furnishing Application

Flutter, FastAPI, Groq API, OpenCV, Supabase, ngrok, Python

- Converted room photos into furnished 2D CAD layouts via Groq vision, OpenCV segmentation, and multistep LLM reasoning.
- Implemented secure endpoints with Supabase Auth and rate limiting for AI-generated design fabrication orders.

BNU Admission Chatbot — Bilingual RAG Assistant

FastAPI, Pinecone, Groq, Cohere, Google Drive API, Docker, Python

- Built hybrid retrieval combining Pinecone dense vectors (bge-m3) + BM25, fused via Reciprocal Rank Fusion + Cohere reranker.
- Engineered automated Google Drive ingestion syncing new/modified PDFs into the vector store with zero manual intervention.

CERTIFICATIONS

- [AWS Certified Machine Learning Engineer – Associate](#)
- [AWS Certified Solutions Architect – Associate](#)
- [AWS Certified AI Practitioner](#)
- [AWS Certified Cloud Practitioner](#)

EDUCATION

B.Sc. in Computer Science – Major in Artificial Intelligence & Machine Learning

Benha National University | 2022 – 2026 | GPA: 3.65 / 4.0

LANGUAGES & ADDITIONAL INFORMATION

Languages: Arabic (Native) | English (Advanced/Professional) | German (Beginner)

Work Authorization: Available for immediate start | Location: Cairo, Egypt (Open to relocation)

Work Mode: Fully flexible – Remote / On-site / Hybrid
